

SAMPLAST® LW200

INTEGRAL CEMENT WATERPROOFING LIQUID

Heavy traffic areas

Water retaining structures

Screed

DESCRIPTION:

- SAMPLAST® LW200 is formulated to meet the highest level of quality standard that prevails in the international market.

ADVANTAGES:

SAMPLAST® LW200 is suitable for use as integral water proofer with both general mass concrete work as well as mortars. It offers the following advantages:

- Ease of use and instant uniform dispersion is achieved due to its liquid form.
- Ensures increased workability of concrete and mortars.
- Reduces water bleeding.
- Can be used with most types of cements including pozzolonic cements except for high alumina cement.
- Reduces the hydraulic permeability of concrete and mortars up to 90% and thereby enhances life by 10 to 15 years.

METHOD OF USE:

- Add SAMPLAST® LW200 (200 gm per 50 kg of cement) in water and stir gently.
- Prepare dry-mix of cement, sand and aggregates as usual.
- Add the dry-mix to SAMPLAST® LW200 solution while mixing.
- Use concrete / mortar-mix as usual.

RECOMMENDED APPLICATIONS:

- RCC water tanks and storage reservoir
- External plastering
- External masonry walls
- Roof and balcony areas
- Plastering of basements and water tanks
- Floor and roof slabs
- Small machinery foundations
- Small bund / check dam walls

SAMPLAST® LW 200 is not recommended for use with structural members like beams and columns and some pre-cast elements particularly where high cement contents are used.

PRODUCT DATA:

Form	Liquid
Base	Sulphonated naphthalene
Specific gravity	1.10 at 25 C
Chloride content	Below 0.05%
Permeability to water	9.8%
Standards	Complies with IS: 2645-1975 (No.CM/L-7161362) and is certified by BIS.
Colour	Brown
Dosage / Consumption	200 gms / 50 kgs of cement to be added with gauging water.
Caution	Do not add SAMPLAST® LW200 to dry mix.
Shelf life	12 months at 25 C
Safety	Non-toxic and non-flammable
Packing	200 kg, 20 kgs, 5 kg & 1 kg.
